2. Proposal Two – Vhembe Community Care Centre

2.1 Organisation Overview

Vhembe Community Care Center is a fictional non-profit organization that provides services to children, unemployed residents, elderly persons, and vulnerable families in the Vhembe District of Limpopo. Community volunteers founded the center in 2019 with the goal of organizing food drives, clothes drives, educational assistance, and resource referrals. At the moment, social media, posters, and community gatherings are its primary means of communication. A website can serve as a focal point for an organization to inform its stakeholders about its goals, initiatives, and contact details (Google, 2026).

A website can act as a focal point for an organization to inform its stakeholders about its goals, initiatives, and contact details (Google, 2026). Vhembe Community Care Center is a fictional non-profit organization that serves children, unemployed residents, elderly people, and vulnerable families in the Vhembe District of Limpopo. The center was founded in 2019 by community volunteers with the goal of organizing food drives, clothing drives, educational assistance, and resource referrals.

2.2 Website Goals and Objectives

An organization's website can serve as a focal point for informing stakeholders about its objectives, projects, and contact information (Google, 2026). In the Vhembe District of Limpopo, children, the unemployed, the elderly, and vulnerable families are served by the fictional non-profit Vhembe Community Care Center. In order to organize food drives, clothing drives, educational support, and resource referrals, community volunteers launched the center in 2019.

2.3 Current Website Analysis

Describe the services provided by the organization and its impact on the community.

Describe ongoing initiatives and forthcoming events.

Boost contribution inquiries and volunteer registrations.

Provide clear contact and program details.

Visits, volunteer form submissions, contribution inquiries, and event registrations can all be used to gage success.

There isn't a specific webpage for the center. Its current communication strategies are helpful for reaching locals, but they don't offer a single, central location for program information and have poor search visibility. A website would lessen reliance on posters

and individual social media posts while increasing communication, accessibility, and credibility. When content is arranged clearly and made available to consumers, a well-structured website can enhance information access (Google, 2026).

2.4 Proposed Website Features and Functionality

home page featuring the current campaign, impact statement, and mission.

History, mission, vision, and values are all included in the "About Us" page.

Our programs site for community outreach, education, clothing, and food assistance.

Get Involved site for collaborations and volunteer work.

Donate/Support page outlining secure ways to make a contribution.

Activities and announcements can be found on the News and Events tab.

Location, phone number, email address, and inquiry form are all on the contact page.

2.5 Design and User Experience

The layout will be dependable, friendly, and community-oriented. White, deep green, and a warm accent color make up the suggested color scheme. For body material with bold, readable headings, Aptos will be utilized. Clear navigation, large headlines, images of community events, and powerful call-to-action buttons will be given top priority in the layout. On mobile devices, forms will be brief and simple to fill out. Particularly in cases where South African personal information protection regulations are applicable, personal information gathered thru forms should be kept to a minimum and treated appropriately (Information Regulator South Africa, 2026).

2.6 Technical Requirements Domain: depending on availability, a good domain like vhembecommunitycare.org.za.

Hosting: simple shared hosting that supports HTTPS and SSL.

Front end: JavaScript, HTML5, and CSS3.

Bootstrap is an optional framework for responsive elements.

Forms: If deployed, an HTML form with secure server-side processing.

Testing includes browser compatibility, accessibility, form validation, mobile responsiveness, and navigation.

2.7 Timeline and Milestones

Week	Milestone	Deliverable
1	Research and planning	Proposal, requirements and content plan
2	Information architecture	Site map and low-fidelity wireframes
3	Development	Core pages and responsive styling
4	Content and testing	Programme content, images and usability testing
5	Finalisation	Corrections, documentation and final website submission

2.8 Budget

Item	Estimated Cost (ZAR)
Domain registration (annual)	R250
Basic hosting with SSL (annual)	R1,500
Website development	R4,000
Content/image preparation	R500
Annual maintenance allowance	R1,000
Estimated first-year total	R7,250

The budget is an academic estimate. Actual costs depend on the hosting provider, domain availability, content requirements and whether volunteers provide photography and design materials. Actual costs should be verified using current quotations before the website is deployed.

2.9 Low-Fidelity Wireframe

Homepage structure:

Header: Logo | Home | About | Programmes | Get Involved | Contact

Hero section: Community Care Centre + mission statement + Get Involved button

Impact section: People helped | Projects | Volunteers

Programmes: Food Support | Education | Clothing | Outreach

Current campaign banner + Support Us button

News/events preview

Footer: Contact | Social links | Privacy notice | Copyright

Get Involved page structure:

Page heading and short introduction

Volunteer form

Partnership information

Donation/support information

Contact details
