- Added this README and the project changelog.

Updated

Reviewed website navigation and internal page links.

Reviewed image alternative text and image paths.

Reviewed the website layout for desktop and mobile screens.

Updated project documentation for Part 3.

To verify before submission

Confirm that all JavaScript features work in the browser.

Confirm that every page and navigation link opens correctly.

Confirm that the logo and all images display correctly.

Test the forms using both valid and invalid information.

Confirm that the map embeds show the intended locations.

Test the website on desktop, tablet and mobile screen sizes.

Replace sample email/contact details and placeholder website URLs.

Add the actual GitHub repository and published website URLs if deployment is required.
