4. Website Structure and Planning

4.1 Sitemap

The sitemap provides a clear representation of the structure and hierarchy of the Tshipidi Bakery website. It shows how visitors can move from the homepage to the different sections of the website. The website will contain five main pages: Home, About Us, Products, Custom Cakes/Enquiry, and Contact.

The homepage will be the main entry point to the website. It will introduce visitors to Tshipidi Bakery and provide quick access to the other pages. The homepage will contain:

Tshipidi Bakery logo and business name

Navigation menu

Hero image

Short introduction to the bakery

Featured products

Custom cake promotion

Call-to-action buttons

Footer

About Us – about.html

The About Us page will provide visitors with information about Tshipidi Bakery. It will contain:

The Contact page will provide customers with ways to communicate with Tshipidi Bakery. It will include:

Telephone number

Email address

Business locations

Opening hours

Contact form

Location information

Footer

4.2 File and Folder Structure

The Tshipidi Bakery website will use a well-organised file and folder structure. Separating HTML files, images, CSS and JavaScript files will make the project easier to manage and update.
